Huynh Hieu Nghia

Data Analyst

06/03/2004 | 0397933915 | Male
huynhhieunghia532@gmail.com | District 7, Ho Chi Minh City

CAREER GOALS

Short-term goals:
As a young employee starting to step into the field of data analysis, I bring enthusiasm and a spirit of not being afraid of challenges to contribute to the Data Analyst position. Taking advantage of the logical thinking of a Software Engineer and real-life experience at Haraworks, I will try my best during the probationary period to quickly master the company's business processes. My priority goal is to standardize operating flows and strictly control data, to bring real value and accuracy to the system right from the first days of joining.

Long-term goal:
With the mindset of constantly learning, I aspire to develop into a Strategic Data Analyst in the future. I don't just stop at data processing, but want to become a reliable companion of the Board of Directors, through building in-depth forecasting models to help optimize resources and make decisions based on data. I believe that, with great persistence and determination, I will actively contribute to the sustainable development and breakthrough successes of the business.

EDUCATION

(2022 - Present)

Studying at: Nguyen Tat Thanh University |
Information Technology (Software Engineering specialization)
Fourth-year student GPA: 3.09/4

WORK EXPERIENCE

(2022 - Present)

Position: Freelancer | Nguyen Tat Thanh University

Optimize data entry process: Participate in document processing with a high sense of responsibility, contributing to shortening system data entry time thanks to fast computer operation skills and scientific thinking.
Ensuring data reliability: Meticulously check the accuracy and logic of input information. This carefulness has helped the specialized department operate smoothly, without problems with record discrepancies.
Active media representative: Closely coordinate with the Faculty's Board of Directors in major enrollment campaigns, directly consult and answer questions for hundreds of parents, contributing to building a professional and friendly image for the school's brand.

(1/2026 - 4/2026)

Position: Customer Experience Intern (CX Intern) | Seedcom Food

Business Analysis & Workflow Drawing: Conducted surveys and

successfully designed 02 detailed Workflow diagrams for applications in the system. This helps master the operational logic and actual data structure of a large enterprise administration platform.

Software Testing & Error Management: Directly participate in feature testing on App Haraworks. Detect, analyze and make detailed error reports to the technical team, ensuring product quality before reaching users.

Develop in-depth guidance documents: Complete 03 sets of user guidance documents based on the drawn Workflows. This skill demonstrates the ability to communicate complex technical information in a simple, clear manner.

Real-life product experience: Accumulate work experience in a real project environment, get familiar with the professional product development process at the enterprise.

SKILLS

- C# /.NET Core/ASP.NET Core (MVC & Web API)
- Python (Pandas, Numpy, Matplotlib)
- HTML / CSS / JavaScript
- SQL (SQL Server – JOIN, GROUP BY)
- Excel / Google Sheets / Power BI
- Ability to learn independently and research new technologies
- Time management – working with a plan
- Communicating and providing information to others.
- Customer-oriented & Professional mindset
- Analytical thinking and problem solving

PROJECT

(2/2023 - 5/2023)

Project: Personal Portfolio Website | Role: Frontend Developer
Scope: Personal project
Link GitHub: https://github.com/huynhhieunghiaa/Portfolio
Technology: HTML5, CSS3, JavaScript, Git/GitHub Pages.
Job Description:

- **Frontend:** Build a multi-page website structure including pages such as: About Us, Skills, Projects, Contact Us, etc.
- **UI/UX:** Design a modern interface using Glassmorphism (frosted glass effect), CSS Animations, and optimize responsiveness for good display on all devices.
- **Deployment:** Manage source code using Git and deploy the website to GitHub Pages.

Result: The website operates smoothly, loads quickly, and serves as a professional "online CV" to effectively introduce yourself.

(10/2024 - 12/2024)

Project: E-commerce website | Role: Full-stack Developer
Scope: Course Project
Link GitHub:
https://github.com/huynhhieunghiaa/ASPCore_BanGiay_MVC
Technology: ASP.NET Core, SQL Server, JavaScript, Bootstrap.
Job Description:

- **Frontend:** Develop a user-friendly, responsive UI using HTML/CSS and JavaScript.

- **Backend:** Build a server to handle sales logic and integrate a "Tracking" module to log user behavior (clicks, views) into the database.
- **Database:** Design a data flow to store transaction history and user behavior for future analysis.

Result: Complete the website with a full user flow, from product viewing to successful payment.

(2/2025 - 5/2025) **Project: Food Ordering App | Role: Mobile Developer**
Scope: Course Project
Link GitHub: https://github.com/huynhhieunghiaa/Appdidong
Technology: React Native, Expo, JavaScript.
Job Description:

- **Mobile UI:** Design and program the screens (Home, Menu, Item Details, Shopping Cart) with a smooth user experience and optimized touch and swipe functionality on mobile devices.
- **Logic:** Handle the logic for adding/editing/deleting items in the shopping cart, calculating the total cost, and managing order status (State Management).
- **Integration:** Connect to the API to retrieve the list of items from the server and send order information to the system.

Result: The application runs stably on both Android/iOS (emulator), has an intuitive interface, and allows users to successfully place orders in 3 steps.

(2/2025 - 05/2025) **Project: RESTful API for Snack Shop | Role: Backend Developer**
Scope: Course Project
Link GitHub: https://github.com/huynhhieunghiaa/API_Coffee
Technology: .NET Core Web API, SQL Server.
Job Description:

- **API Development:** Build a RESTful endpoint system (GET, POST, PUT, DELETE) to provide data to the Frontend (Mobile/Web).
- **Security:** Configure authentication and authorization using JWT to protect critical APIs.
- **Documentation:** Use Swagger UI to write intuitive API user manuals, making integration and testing easier for the Frontend team.

Results: Fast API response time, efficient handling of complex data retrieval requests, and secure user information.

TITLES AND AWARDS

2023	Encouragement Scholarship
2024	Scholarships for Encouragement & Completion of Admissions Support
2025	Scholarships for Encouragement & Completion of Admissions Support

CERTIFICATE

2024	Microsoft Office Specialist (MOS)
